

# PeykAsa ISS

Our International Signaling Service Resolves the Interconnection Issues of Mobile Operators Across 2G and 3G Networks Which is based on the International Standard SS7 and SIGTRAN Protocols

Expand Your Footprints  
Enable Roaming with  
Overseas Operators Using

## International 2G/3G/4G Signaling Service

- ▶ Faster Time-to-Market, Lower CAPEX and OPEX
- ▶ Single Point of Access to the International 2G,3G and 4G Signaling Networks
- ▶ Carrier-Grade Quality
- ▶ Advanced Traffic Monitoring, Alerting and Reporting
- ▶ 24/7 Support Team

## Connect to Roaming Partners

Establishing a bilateral relationship is somehow time-consuming and a complex procedure for mobile network operators but organizing an international roaming partnership is highly valuable.

Mobile operators are increasingly searching for ways to further improve their overall business efficiency. PeykAsa international signaling service is a managed service that offers a scalable and innovative solution for MNOs worldwide to overcome this concern.

We assure your revenue growth by providing the connectivity that enables roaming and messaging between you and your international roaming partner. Along with our established 2G/3G International SCCP Transport Service, PeykAsa International Signaling

Service provides Diameter Exchange service that enables 4G/LTE roaming. LTE Roaming is built to cost-effectively add roaming relationships with potential connectivity to hundreds of roaming partners throughout the world.

Beside its efficient connectivity, our Service architecture hides your network from external threats and attacks.

### Key Features of PeykAsa Diameter Signaling Exchange Service:

- ▶ Secure and Single Point of Interconnection
- ▶ Supports Diameter-Based Interfaces for Subscriber Management (S6) and Policy Control (S9)
- ▶ Scalable Architecture
- ▶ Real-Time Monitoring of Diameter Signaling
- ▶ Fully Compatible with GSMA and 3GPP

### Key Features of PeykAsa SCCP Signaling Transport Service:

- ▶ Enables Roaming Value-Added Services
- ▶ Multi-Vendor Flexibility
- ▶ Anti-Spoof and Anti-Spam
- ▶ Real-Time Monitoring of SS7/SIGTRAN Signaling
- ▶ Routing and Congestion Management
- ▶ Fully Compatible with ITU

## Having a Single Agreement with PeykAsa Lets Mobile Operators:

### Expand Your Roaming Revenue While Increasing Your Customer Satisfaction

Have the Opportunity to Access Global Operators in a Fully Transparent Manner

Interconnect More Easily and Expand Their International Footprints

Provide High Quality Transport and Routing Functionalities to Mobile Networks via the International Signaling Standard, Diameter and SS7/SIGTRAN

Provides Customized and Multi-Currency Billing Solution for Mobile Operators to Accelerate their Deployment
