

A network diagram on an orange background with white lines and icons. The icons include a globe, a location pin, a speech bubble, a radio tower, a hand pointing, and a smartphone. Arrows indicate the flow of the network.

# PeykAsa MVNE

## PeykAsa MVNE (Mobile Virtual Network Enabler)

- ▶ Total, Highly Scalable and Cost Effective Solution
- ▶ CAPEX/OPEX Optimization
- ▶ Evolving Platform
- ▶ Fast Deployment/Time-to-Market
- ▶ Operational Flexibility and Transparency
- ▶ High Performance and Scalable Tools and Services

## PeykAsa

In the early 2000s, a revolution in the telecommunication industry has led to the advent of MVNOs as providers of new services and products.

Getting under control the new challenges introduced by this competitive market, is the key for MVNOs to success.

## MVNO Requirements

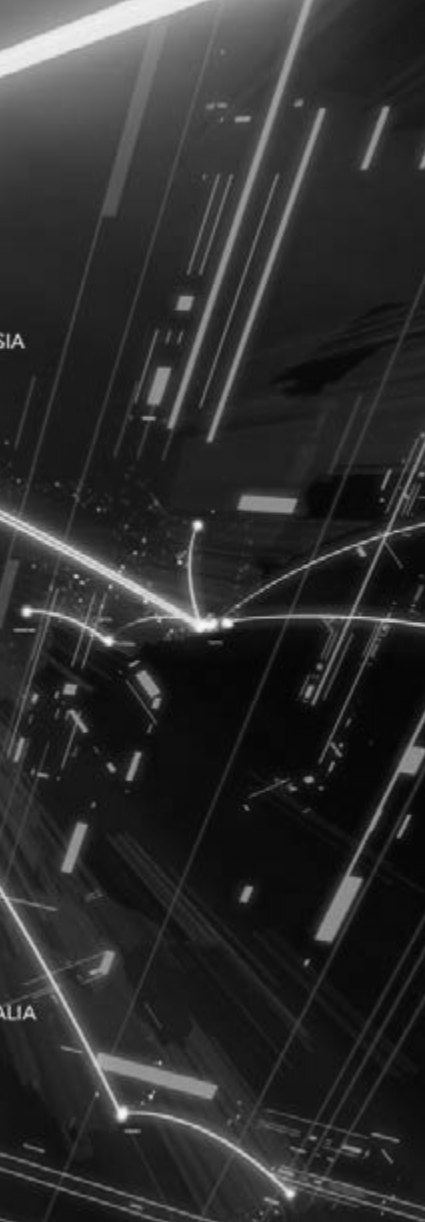

---

- ▶ Launching Services Independent of MNOs
- ▶ Compatibility with MNOs
- ▶ Controlling User IDs and Accounts Data
- ▶ Enforcing Policy Remotely
- ▶ Detecting User Behavior and Context Data
- ▶ Variable Pricing, Credit and Quota Control
- ▶ Connecting to 3rd Party Service/Content Providers and Getting Paid
- ▶ Security for Non-MNO Untrusted Access

## So We Deliver

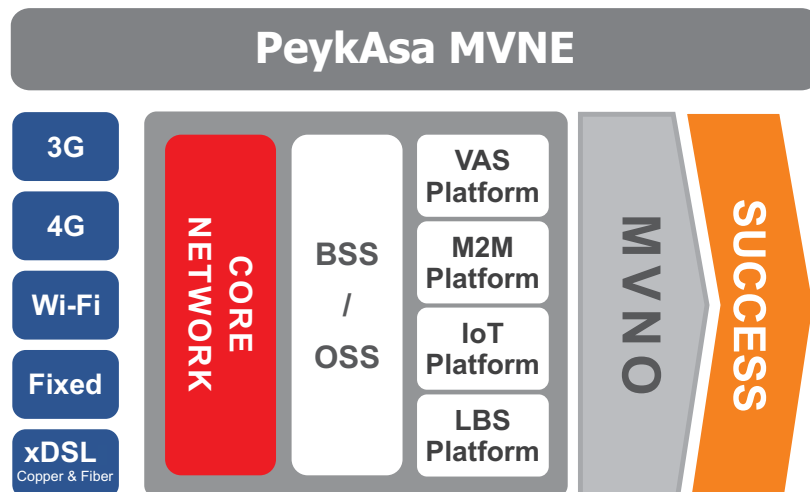

---

- ▶ Total Solutions
- ▶ Optimized CAPEX/OPEX
- ▶ Quality of Service Monitoring
- ▶ Powerful and Flexible Platforms
- ▶ Fast Deployment/Time-to-Market
- ▶ Operational Flexibility and Transparency
- ▶ High Performance and Scalable Tools and Services

## PeykAsa MVNE

These challenges have created the opportunity for MVNEs, to act as an interface between MVNOs as resellers or service providers and host MNOs. Thanks to long-term cooperation with different Iranian MNOs and customers, PeykAsa has gained perfect insight into the telecommunication market and potential customers' needs. We offer a range of flexible, modular and scalable solutions as 'PeykAsa MVNE' which is tailored to MVNO demands and equips them with the required technology infrastructure and business solutions. 'PeykAsa MVNE' enables MVNOs and MNOs to broaden their services and extensions, reduce their costs and overcome network complexities.

## PeykAsa Core Network

- ▶ Complete 2G/3G/4G Core Network Nodes
- ▶ High Level Flexibility
- ▶ Multi-Vendor Interoperability
- ▶ Easy Integration with the Client's Other Solutions
- ▶ Total Isolation between the Virtual Network and the Host Network
- ▶ Fully Modular and Scalable to Millions of Subscribers

A comprehensive set of nodes are included in the **PeykAsa MVNE** core network solution.
